[What is Stress-strain Curve of Ductile Material ...](#)

The fracture strength is the point of strain (fracture point) where the material physically separates. At this point, the strain reaches its maximum value and the material actually fractures, even though the corresponding stress may be less than the ultimate strength at this point.

[Vetro borosilicato - Wikipedia](#)

L'acer és un material metàl·lic format bàsicament per un aliatge de ferro, carboni i de vegades alguns additius. La quantitat de carboni no supera l'1,76% en pes del total de ferro i carboni, i els percentatges habituals són entre 0,2% i 0,3%. El ferro pur és un metall molt dúctil però de baixa resistència. El carboni li confereix duresa i resistència.
